

Japanese Series Bridge

Design & Copyright by James Pierce & Associates

- Authentic Japanese Style
- Available with or without steps
- Uses highly durable Australian Hardwoods
- Suits containerisation
- Supplied fully assembled

OSA's Authentic Japanese styled bridge was developed after considerable research into traditional designs.

By combining authentic styles with the most durable hardwoods grown in Australia, an exceptionally durable bridge is achieved.

Each bridge is a one off structure to suit a specific location so the owner's preferences can usually be accommodated.

To be more authentic, some domestic owners will require steps (as illustrated), but where the public have access a version without steps is available.

日本向けにデザインされたオーストラリア製木橋

Japanese Series Bridge

Design & Copyright by James Pierce & Associates

特長: 日本的なデザイン
耐久性、強度に優れたオーストラリアのハードウッド材
階段付き又は階段無しの設計
完全に組立てた状態でコンテナ出荷

アウトドア ◇ ストラクチュアズ ◇ オーストラリア社 (OSA社) は日本の伝統的な橋建築を研究して、日本市場に適した木橋を造り上げました。

様々な場所 / 設置条件に合わせて個別設計されているため、お客様のご希望に合った対応ができます。写真のような階段付きのデザインも可能です。

OSA社の木橋はすべて素材にオーストラリアのハードウッド材が使用されているため、耐久性は抜群、どんな戸外の環境にも最適です。

Australian Bridges designed for the Japanese Market

Features: Japanese Inspired Design,
Highly Durable Australian Hardwoods,
Designed With or Without Steps,
Supplied fully Assembled in Containers.

The Company, **Outdoor Structures Australia (OSA)**, has researched and developed bridge designs of a traditional Japanese style. Bridges are individually designed to suit each location and to meet the purchaser's specific requirements. As illustrated, designs incorporating steps have also been developed. All bridges are constructed of Australian Hardwoods which have a very high durability in all outdoor environments.
